

An engineer's brain, a triathlete's body.

Software engineer from Taiwan. Finished a full marathon, a 113 km triathlon, and the Sun Moon Lake open-water swim — now looking for my next challenge, in Japan. I'm not coming to Japan to save money — I'm coming to live differently. Offer me a unique experience, and the rest is negotiable.

## WHAT I CAN DO FOR YOU

### NXP Semiconductors

2020 – 2023

Global teamwork · Working English

Worked in English every day with colleagues in Europe, the US, India, and the Philippines. Coordinated cross-country processes and automated the tedious reporting away.

### Vpon

2023 – 2024

Japan market · Tourism data

Analyzed Japan's inbound/outbound and tourism data, delivering insights to prefectural governments. I turn messy data into charts anyone can read at a glance.

### Tomofun

2025 – Present

AI in practice · Growth marketing

Driving growth and e-commerce at a company where Japan is a key market. I use AI tools to sharpen marketing and streamline operations — small team, big output.

## RACE HIGHLIGHTS

Full marathon 42.195 km · Puyuma 113 triathlon · Sun Moon Lake swim 3,000 m · Around-Taiwan ride 1,100 km · Taipei→Kaohsiung 360 km/day

## LANGUAGES

- **Chinese** — Native
- **English** — Business fluent. Three years at NXP working entirely in English with teams across four continents
- **Japanese** — Just getting started (N4–N5), studying every day. At work, I lean on AI to make sure nothing slips: understanding instructions, double-checking details, reporting on time. My goal: a proper conversation with you in Japanese, soon

## SKILLS

TypeScript / React / Node / Data Visualization / AI tools (Claude, ChatGPT) / Power BI / RPA Automation

## EDUCATION

M.S. Industrial Engineering & Enterprise Information, Tunghai University (2018–2020, Taichung, Taiwan)

## LICENSE

Driver's license (automatic, Taiwan)
